Stocking Rose Gardens

New Roses for '52

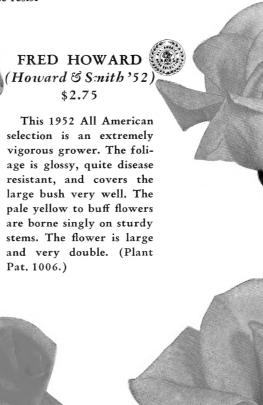

### CHIEF SEATTLE (Swim '52) \$2.50

A rich, pleasing buff apricot bloom of 40-50 petals. The large symmetrical flower opens very slowly and each petal is slightly ruffled. The color will vary with the season. Flowers are borne singly on sturdy stems. The plant is upright and vigorous. An added joy is the delightful fragrance, similar to the old Marechal Niel. (Plant Pat. Pend.)

## **VOGUE** (Boerner '52) § \$2.25

The floribunda All American selection is a sister seedling of Fashion of a glowing cherry-coral color. The flowers are high centered and have a very lovely form. Plants are upright in habit and will become 2½-3 feet tall making them ideal for hedging and mass effects. The

large tresses of flowers have a spicy fragrance, similar to carnations. Foliage is a rich dark green that is disease resistant. Plant Pat. 926.

# The New French Irio

### SYMPHONIE (Meilland '50) \$2.50

There is no other pink rose which has the luminous quality of Symphonie. The silvery undertones and the fine netting of veins make it most appealing. The blooms are large and intensely fragrant. Foliage is glossy and quite free of disease. The blooms may burn somewhat in the hot summer sun but are a glory in spring and fall. This is another distinctive daughter of Peace. Plant Pat. 958

Without reservation this is the most magnificent deep red rose we have ever seen. The buds have a blackish sheen to them and the petals have a marvelous velvety texture as they unfurl to a crisp bloom. The full blown rose is glorious and never fades blue. Very fragrant. It is a strong grower and may send out extremely vigorous ground canes; this does not always make for a well balanced plant. In spite of this fault, you will surely want one somewhere in your garden. Plant Pat. 933.

## SUZON LOTTHE (Meilland '50)

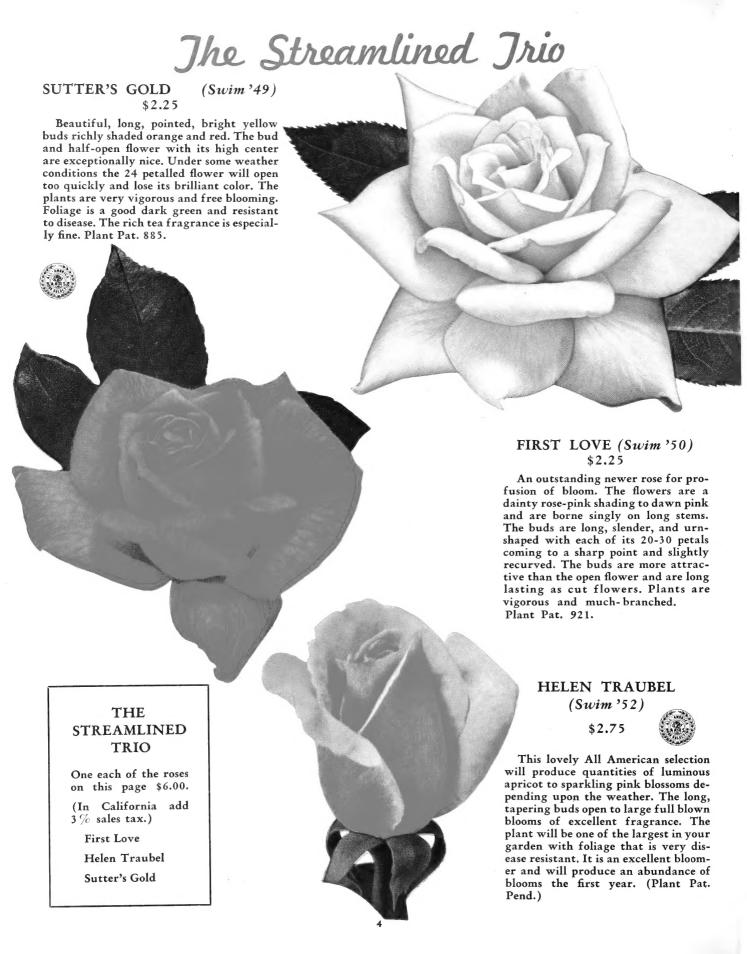

\$2.50

Suzon is one of the loveliest and most delicate in coloring of the newer pinks. It has a high center and holds its form nicely as it opens to the full blown flower. The soft pearl pink petals shade to a deeper pink at the edges where they have been more exposed to the sun. The center of the rose is peach. A delightful fragrance. The bushes are strong and have a good textured foliage. It is indeed a worthy daughter of Peace. Plant Pat. 885.

A Rose

There is a world of wonder in this rose: God made it and His whole creation grows To a point of perfect beauty In this garden plot. He knows The poet's thrill On this June morning, as He sees His will To beauty taking form, His word Made flesh, and dwelling among men. All mysteries In this flower meet And intertwine, The universal is concrete The human and divine, In one unique and perfect thing, are fused Into a unity of Love, This rose as I behold it;

For all things gave it me, The stars have helped to mold it, The air, soft moonlight, and the rain, The meekness of old mother earth, The many-billowed sea. The evolution of ten million years, And all the pain Of ages, brought it to its birth And gave it me. The tears of Christ are in it And His Blood has dyed it red, I could not see it but for Him Because He led Me to the love of God, From which all beauty springs. I and the rose Are one.

G. A. Studdert-Kennedy.

#### OUR SILVER ANNIVERSARY

We enjoy reminiscing over the twenty five years we have been growing roses. We have made many friends and as we look over the mailing list, we find the names of those who have been purchasing roses year after year. We are very appreciative of your loyalty. It is your support and your recommending our roses to your friends that has built our business to its present size. Needing an associate of the highest quality, we are pleased to announce that George S. Haight, who has been with us for three years, is now general manager. Many of you know George, and we are anxious for the rest of you to become acquainted with him. He is doing much to improve the efficiency of our firm.

Looking forward to another "rosy" year, we are

Cordially yours,

Olyde + Ramona Stocking

#### THE ALL AMERICA ROSE SELECTIONS

The roses carrying this distinctive emblem are the most outstanding introductions of recent years. New introductions are being judged yearly in the nineteen All American Rose Selection Test Gardens and the five demonstration gardens.

The A.A.R.S. is an organization of nurserymen and hybridizers banded together for the specific purpose of selecting the best new introductions each year. New varieties are sent to the test and demonstration gardens each year where they are tested for a period of two years. These roses are scored on thirteen basic points such as form, habit, disease resistance, etc. At the end of the two year trial period, if any of the roses have attained a high enough score and are worthy of introduction to the general public in the opinion of the judges, they are given the coveted All American Award.

We are fortunate in having one of the nineteen test gardens here on our growing grounds. You are cordially invited to visit it to preview the new roses of the next two years.

SHIPPING—Our new rose crop is available about the end of December, at which time we commence shipping and continue through the middle of March. Our orders are handled in numerical order. We shall ship your order as promptly as possible at the proper planting time for your locality. Great care is taken in filling orders as well as in packing them to insure their reaching destinations in perfect condition. If through delay in shipping, the bushes should appear dry, bury the bushes in a trench, cover them completely with earth and keep wet for four days. Wet peat moss may be used if preferred. We guarantee every plant to be true to name and to reach you in good condition. We will not be liable for plant losses as the result of flood, drought, frost or other causes beyond our control.

DISCOUNTS—When purchasing 10 or more plants regardless of varieties, bushes, or climbers, please deduct 10% except on special groups where no further discounts are allowed. Tree roses may not be included in this discount.

TERMS—In keeping with the general practice of nurseries throughout the country, may we suggest you send cash with your orders. In cases where substitutions are not desired, prompt refunds will be made in appreciation of your initial kindness to us.

#### PACKING AND SHIPPING

On all orders of \$5.00 or more of bush or climbers we shall pay delivery charges to any point in the U. S. We reserve the right to choose the best way to ship. On orders less than \$5.00 please add 50% for packing and shipping charges. On any order containing two trees or less please add 50% per tree for packing and shipping charges. On orders of three or more trees there is no packing or shipping charge.

Foreign orders are requested to write for information requesting an estimate of shipping costs.

POTTED PLANTS—Potted plants are available after March 15th and throughout the summer at a slight increase over the prices listed in the catalogue. We do not ship any potted material.

PRICE CHANGES—For the first time in six years we have been forced into a major increase in our rose prices. We hope to maintain the prices as listed in this catalogue for the coming season. However, pending increases in parcel post and railway express charges may force us to make price changes and we reserve the right to make such changes at any time without notice.

CALIFORNIA SALES TAX—Please add 3 % to purchase price. This does not apply to purchasers outside the state.

SUBSTITUTIONS—We never substitute unless advised to do so. It is our deepest desire to supply each and everyone with the desired varieties of roses. However, due to unforeseen circumstances, such as crop failures and unknown demands, we cannot always supply all of the varieties you order. Thus to eliminate correspondence and delay, may we ask if we may substitute varieties of equal or more value in the same color range as ordered, using our knowledge of the adaptability of varieties to your region, as our guide? It is our desire to serve you and to do it well; thus we ask this privilege of substitution. Please designate (yes or no) such permission on your order.

#### PINTO TAG

We are pleased that our nursery, which was the first in Northern California to receive this award, has successfully maintained it. The Pinto Tag signifies that the nursery has been given a clean bill of health and that the stock may be shipped into most of the counties of the state without further inspection.

#### PLANTING AND CULTURAL HINTS

Open package as soon as received. If the roots are moist the plants may be planted at once. If, however, they appear dry, soak in water over night, and bury the entire bundle in a trench. Cover with earth and soak thoroughly. In three or four days the bushes will be ready to plant.

Cut off all bruised or broken roots with a sharp knife.

Loosen all labels, so as not to cut into plant.

Select a location free of tree or shrub roots, and exposed to at least half a day sun.

Dig a hole 18" to 24" in depth and width. If soil does not have good drainage, a gravel drain should be provided, Fig. 1.

It is always well to prepare soil well in advance of planting time. A mixture of 10% peat, 10% rotted manure and 10% rotted compost with 70% top soil produces excellent results.

Fill the hole half full of the mixture and firm well. Make a coneshaped mound in center of hole, Fig. 1. Place crown of roots on cone, spreading roots, Fig. 2. Fill in above roots with soil and fill basin twice with water, Fig. 3. After water has settled, remainder of soil may be filled in, making sure the bud union is level or slightly above the level of the ground. In colder regions the bud union should be 2 inches below the surface of the ground. Mound soil four inches above union to prevent drying out and leave until growth starts when soil should be removed to just under bud union, Fig. 4.

All plants are pruned moderately. After planting, canes should be pruned from six to eight inches long, with the top bud pointing outward. Keep plants well watered all during the growing period.

Roses prefer a soil slightly acid, but will tolerate a slightly alkaline soil. They seem to do well in both light and heavy soil, but *must*, however, have good drainage.

Roses are usually hungry and thirsty. One of our most common mistakes is not giving them sufficient water. Keep the ground moist. Water thoroughly each time. Frequency of watering depends on your soil, usually from one- to three-week intervals. Water in morning only.

In the early spring, mulch rose beds with either cow manure, peat moss or lawn clippings. Cow manure is excellent if clean, but foul weeds and insect pests may be brought into the garden through it. Feed each plant a half tea-cup of a well-balanced commercial fertilizer every six weeks during the growing season.

If you do not use a mulch, cultivate the ground lightly after each watering; just enough to break the crust. Deep cultivating cuts the feeding rootlets.

Keep the roses well watered in summer. Allowing them to dry and go dormant causes the bushes to defoliate and sunburn.

Ground canes are the best wood on a rose bush. They are the soft new canes coming from around the bud union, with foliage and thorns identical to the older growth. Suckers come from below the bud union and have entirely different foliage, thorns and color. Suckers should be cut out as soon as identified.

#### PEST CONTROL

Roses, like all living plants, have insects and diseases to attack them. These may be controlled with little effort. The most important part of control is thoroughness and consistency. A program of spraying or dusting every ten days should be sufficient.

There are many effective sprays and dusts on the market, Often similar materials are sold under different trade names. We have found Rix (2 teaspoons to the gallon) and Fermate (1 tablespoon to the gallon) to be very effective in the control of rust and mildew. Vapatone or Extrax Delux added will control insects. In many sections Triogen, a com-

bination spray is excellent. If one prefers dusts, duPont Rose dust, Ortho Rose dust, or a mixture of 9 parts of 325 mesh ground dusting sulphur to 1 part Fermate. Powdered nicotine or rotenone may be added to the latter as an insecticide.

A cleanup spray immediately after the winter pruning, consisting of 10 tablespoons of Bordeaux mixture to a gallon of water, is very effective in destroying fungi spores. This spraying should be repeated just before the buds break in the spring. Spray the ground around the plant, after raking up and burning the old leaves, as well as the plant.

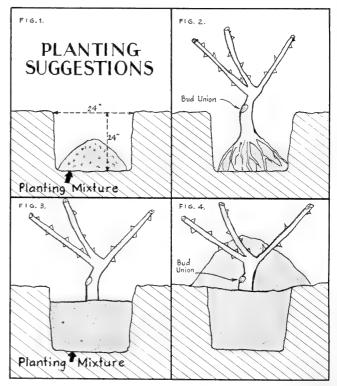

#### PRUNING

Pruning is very important. We cannot give complete instructions on pruning that will apply to all varieties and in all sections of the country. However, there are general rules that can be followed. As roses are produced on new wood, vigorous growth must be encouraged. During the dormant season, leave the new wood and cut out as much of the old wood as is possible and yet retain the form of the plant. Cut back about half of the previous year's growth, cutting ½ inch above a leaf that is pointing on the outside of the bush. All dead and weak wood should be eliminated. Proper cutting of roses should be sufficient for summer pruning.

#### **CUTTING ROSES**

In cutting roses, always leave three or four leaves of the new blooming wood, cutting about 1/4 inch above a leaf on the outside of the bush.

Cutting roses in the late afternoon has been proven to be the most satisfactory time. Double roses should be cut as the petals begin to unfurl, single roses as the sepals separate, showing the color. Mash or split the ends of the stems about a half inch and plunge immediately in cold water up to the neck of the rose. Leave out of doors over night. Occasionally a variety will keep longer by plunging the ends in boiling water. Charlotte Armstrong is one of these.

Patented varieties of roses listed are being handled under license from the patent owners

#### ANGELS MATEU

#### \$1.75 CHIEF SEATTLE (Swim '51)

\$2.50

A gold medal winner in 1934. The large double blooms are deep old rose flushed with orange, with a ripe raspberry fragrance. An upright growing plant with large glossy, disease-resistant foliage.

PLANT PAT. 174

#### APPLAUSE (Swim)

\$2.00

The ovoid bud of 30-40 petals opens to a fragrant light red rose. The large leathery leaves are quite disease resistant and are borne on a low, bushy, compact plant. Buds and flowers are largest in the spring. A good bloomer. PLANT PAT. 829

#### APRICOT DAWN

\$1.50

A sport of Golden Dawn. Flowers are an apricot shaded yellow at the base. The reverse of the petal is a pinkapricot. A moderate grower.

#### **AUTUMN**

\$1.25

An unusual combination of deep burnt orange and pink streaked with red. Moderately fragrant and very lasting. The bush is a strong upright grower with an abundance of thick glossy foliage. Mildews in some locations. Excellent in coastal regions.

#### BRAVO (H. C. Swim)

\$2.25

A new rose of an intense and brilliant red which is long lasting and unfading. The 45 petals are slightly ruffled at the edges and form a high centered flower. A moderate grower with only slight fragrance. A free bloomer. Especially adapted to hot weather.

PLANT PAT. APPLIED FOR

### CAPISTRANO

(Germain's Seed Co.)

This vigorous, upright rose produces an early abundance

of large buds and flowers of a rich shade of deep glowing pink, with good fragrance. Capistrano grows about 4 ft. in height and is well clothed in heavy, leathery foliage. PLANT PAT. 922

#### CHARLES MALLERIN (Meilland '51)

\$2,50

Without reservation this is the most magnificent deep red rose we have ever seen. The buds have a blackish sheen to them and the petals have a marvelous velvety texture as they unfurl to a crisp bloom. The full blown rose is glorious and never fades blue. Very fragrant. It is a strong grower and may send out extremely vigorous ground canes which does not always make for a well-balanced plant. In spite of this fault, you will surely want one somewhere in your garden.

PLANT PAT. 933

#### CHARLOTTE ARMSTRONG (Lammerts)

\$2.00

Charlotte Armstrong has established itself as one of the finest roses ever introduced. It is a strong grower and produces an abundance of excellent blooms. The blood red buds are exceptionally long, pointed, and open to large roses which vary in color from blood red to a very deep pink according to weather conditions. A spreading grower with good foliage. Best in warm climates.

PLANT PAT. 455

## PLANT PAT. PENDING CHRISTOPHER STONE

\$1.50

This large, vivid scarlet rose with a velvety crimson sheen in the open flower will be one of the most brilliant and colorful in your garden. The bud is long, pointed, and moderately fragrant. The foliage is a bronzy green that may mildew and rust in those areas where such diseases are a problem.

A rich, pleasing buff apricot bloom of 40-60 petals. The

large symmetrical flower opens very slowly and each petal

is slightly ruffled. The color and form will vary with the

season. Flowers are borne singly on sturdy stems. The

plant is upright and vigorous. An added joy is the delight-

ful fragrance, similar to the old Marechal Niel.

#### COUNTESS VANDAL

\$1.50

The bronze-pink buds open to large high-centered blooms of blended carmine, pink, buff, and gold. The Countess unfurls in a most interesting symmetrical manner, which adds to its artisticness. An excellent bloomer under nearly all weather conditions. A fine, fragrant, cutting rose.

#### CRIMSON GLORY (Kordes)

\$1.75

In some sections of the country this rose has been acclaimed the best red rose. Of perfect form, the large, double urn-shaped flowers are a deep velvety crimson and intensely fragrant. The plant is a vigorous, bushy grower and continuous bloomer. At best in warm climates.

PLANT PAT. 105

#### DAINTY BESS

\$1.25

Considered by many to be the best single rose. A medium size flower with crinkled and wavy petals of a soft rose pink. The bright crimson stamens make a very pleasing contrast. A good cut flower if cut in bud. A vigorous upright grower and prolific bloomer.

#### DEBONAIR (Dr. Lammerts)

\$1.75

This new yellow rose has received very favorable comment. The 50-petaled rose is primrose yellow. The bud is medium size, with a high center and opens to a very fragrant rose 3 1/2 inches in diameter. The plant is a vigorous grower with very nice dark green, disease-resistant foliage. PLANT PAT. 677

#### DUCHESS of PENARANDA

\$1.25

Here is an appealing color. The buds are brilliant orange, opening to coppery apricot. However, this color does change at different times of the year and as the flower ages. The plant is a strong grower with plenty of glossy, light green foliage, and an abundance of fragrant blooms.

ALL-AMERICA ROSE SELECTION

ECLIPSE

FRANCES ASHTON

\$1.25

This is unquestionably one of the best all purpose yellow roses. The endless bounty of streamlined buds of rich gold enhanced by ornamental sepals are a new mark in grace and beauty. These elegant, tapering buds borne on long, straight stems are especially fine for cutting. The seemingly disease-resistant plants with rich, heavy foliage have an upright habit.

PLANT PAT. 172

#### ELLEN WILLMOTT

\$1.50

\$1.75

A large, single creamy lemon flushed with pink at the edges. Foliage is leathery. Plant is upright and growth is vigorous.

#### ENCHANTMENT (Jackson & Perkins)

\$2.00

A large, long lasting rose of delicate fragrance. Large, long stately buds of apricot and clear yellow at the base open to large, graceful high centered peach pink blooms. These wholesome flowers are borne on vigorous, upright plants, wealthy with dark green foliage.

PLANT PAT. 737

#### ETOILE DE HOLLANDE

\$1.50

One of the best of the red roses. A beautiful dark, velvety maroon red that seldom blues. Very fragrant and excellent as a cut flower. Growth sometimes rather slow the first year, after that a vigorous grower with an abundance of disease-resistant foliage. A prolific bloomer.

#### FAIENCE

\$1.25

A bicolor of soft peach and cadmium yellow. The long buds of soft peach shade to a deep yellow at the base on the outside of the petal. A good grower and continuous bloomer.

#### FANDANGO (H. Swim)

\$2.00

This is a beautiful rose with rich coloring and mild fragrance. The ovoid buds are a rich, deep scarlet and gracefully change to a bright cerise red as the flower opens. The large petals (16 to 25) have a crisp, ruffled appearance which adds to the beauty. This earliest of bloomers is compact and vigorous with glossy, heavy foliage to background the endless mass of color. A fine rose!

PLANT PAT. 894

#### FIRST LOVE

\$2.25

An outstanding new rose for profusion of bloom. The flowers are a dainty rose-pink shading to dawn pink and are borne singly on long stems. The buds are long, slender and urn-shaped with each of its 20-30 petals coming to a sharp point. Mild fragrance.

PLANT PAT. 921

#### FORTY-NINER

#### (H. Swim)

\$2.00

A most brilliant rose of vivid Oriental red with a reverse of chrome yellow changing to straw yellow. Buds are well shaped and have from 25 to 40 petals. Moderately fragrant. Plant is a strong grower with medium size, dark glossy foliage. A distinct novelty, which is at its best in the spring and fall.

PLANT PAT. 792

age. A good single.

FRAU KARL DRUSCHKI

\$1.25

This hybrid perpetual is one of the oldest in commerce today and one of the purest whites. The buds are large, long-pointed, tinged with carmine pink and open to snowwhite blooms. At its best in the warmer climates.

A strong growing, free blooming single rose of a uniform

carmine color and wine colored stamens. Excellent foli-

#### FRED EDMUNDS

\$1.75

For our coastal regions and in the cooler climates, Fred Edmunds is a glorious rose. The slender pointed buds of burnt orange, open to beautiful roses of 25 petals of coppery orange changing to soft apricot. The plant is a moderate, bushy grower with beautiful glossy, dark green foliage.

PLANT PAT. 731

#### FRED HOWARD

(Howard and Smith '51) \$2.75

This 1952 All American Selection is an extremely vigorous grower. The foliage is glossy, quite disease resistant, and covers the large bush very well. The pale yellow to buff flowers are borne singly on sturdy stems. The flower is large and very double.

PLANT PAT. 1006

#### **GIRONA**

\$1.25

A good strong grower of great productivity and fine fragrance. The buds are long, pointed, of fine form, and are turkey red and golden yellow; a most pleasing combination. The plant is a strong upright grower, with long, sturdy stems, having leathery, disease-resistant foliage.

#### GOLDEN EMBLEM

\$1.25

A good old standby. The large, long bud of cadmium yellow, splashed and shaded red, is perfection in itself. These buds open to large, double blooms of canary yellow, oozing with fragrance. The strong, growing plants, covered with waxy green foliage, at times are susceptible to die-back. Still a good yellow.

#### GOOD NEWS (Meilland '40)

\$1.75

The buds of coppery pink open slowly to a very large double blossom of 60 or more petals of a soft, satiny, pale pink. The plants are vigorous and tend to grow tall but do not become "leggy" as the foliage is maintained to the ground.

PLANT PAT. 426

#### GRANDE DUCHESSE CHARLOTTE

\$1.75

These long, claret red to chestnut red buds open to firm petalled blooms of tomato red. In the open flower the petals recurve to make a delightful relaxed rose of artistic beauty with a faint carnation fragrance. Plants are tall, vigorous, and well branched with blooms that are borne singly on sturdy stems. A good cutting rose.

PLANT PAT. 774

#### GRUSS an COBURG

\$1.25

This rose seems to adapt itself especially well to difficult surroundings, such as partial shade, windy corners, etc. The very floriferous plants produce yellowish buff flowers with varying outside shades. An extremely vigorous bush, of an upright nature. A late bloomer and very fragrant.

ALL-AMERICA ROSE SELECTION

#### HEART'S DESIRE

.75 K. T. MARSHALI

A lovely bloom of warm clear pink which has heavily textured petals. Nicest in the bud and half-open bloom. Fruity fragrance. Good leathery foliage and nice stems for cutting.

PLANT PAT. 607

HELEN TRAUBEL

grower.

(Swim '52)

A very fragrant red rose. Long pointed buds of lum-

inous crimson to scarlet are produced on long stems. The

stems are sometimes weak; often extra feeding will help

correct this fault. The large, 30 petaled, high centered

blooms are exceedingly fragrant. A vigorous, upright

PLANT PAT. 501

\$2.75

This lovely All American Selection will produce quantities of luminous apricot to sparkling pink blossoms depending upon the weather. The buds are long, tapering, and open to a large full blown bloom of excellent fragrance. The plant will be one of the largest in your garden with foliage that is disease resistant. It is an excellent bloomer and will produce quantities of blossoms the first year.

PLANT PAT. PENDING

#### HINRICH GAEDE

\$1.25

The bud is a clear nasturtium red opening to a large very double flower of orange red with a good fragrance. A most prolific bloomer; bush is a vigorous grower with glossy bronzy green foliage.

#### HORACE McFARLAND

\$1.7

A fine rose of exhibition qualities. A compact, upright plant, covered with large leathery foliage; produces an incessant supply of blooms. The large ovoid buds of deep apricot open to large, very double, well formed buff salmon blooms. These large flowers are borne on erect, strong stems and gradually pass to soft coral pink open flowers. Spicy fragrance.

PLANT PAT. 730

#### INNOCENCE

\$1.25

A pure white single rose with wine-red stamens. The blooms are about five inches across. Plants are of medium height with good green foliage.

#### IRISH ELEGANCE

\$1.2

One of the old favorite single roses which varies in color from a bronzy peach with touches of scarlet to a lighter apricot. Good clean foliage.

#### JOANNA HILL

\$1.25

An old fayorite creamy yellow with an orange center. The long buds are moderately fragrant.

#### I. OTTO THILOW

\$1.50

This is one of the finest, most perfectly formed pink roses. The flower is large, double, high centered and of a glowing rose pink. A constant bloomer. Growth is vigorous and with an abundance of thick leathery foliage.

#### JUNO (H. C. Swim)

\$2.0

The buds and flowers are extraordinarily large, but because of the lovely lines never appear coarse. As the clear pink buds unfold into big double (40 petaled) high centered flowers, the color fades gracefully to lighter tones of pink, but never loses its attractiveness. The plant is low, bushy, and compact with short, stout stems abundantly covered with large, glossy foliage.

PLANT PAT. 895

#### KOROVO

\$1.50

15

A popular rose, especially in the southern states. Its color is old rose, shaded peach. The buds have beautiful form and are delightfully fragrant. The plant is an excellent grower with fine disease-resistant foliage.

#### LADY FORTEVIOT

\$1.25

\$1.75

It is a deep golden yellow changing to deep apricot and having a very pleasing fragrance. A vigorous, bushy grower with glossy, bronzy green foliage and a continuous bloomer. Excellent in nearly all sections, but particularly recommended for coastal climate.

#### LADY TRENT

\$1.50

We are well pleased with this rose after growing it for several years. The bud is of average size, high pointed center, opening to a full double flower of coppery orange. Fragrant. The plant is a medium grower with very heavy, dark green glossy foliage, exceptionally free of disease.

#### L. C. BRESLAU

\$1.25

A large, very double rose of coral red shaded apricot which is borne on strong, stiff stems. The foliage is leathery and glossy. Good for cutting. Moderately fragrant.

#### LOWELL THOMAS

\$2.00

This yellow rose is one of the best of the newer roses. The nicely formed buds of chrome yellow open to large flowers of rich yellow with a moderate fragrance. The plant is a strong grower with large, dark green foliage that has been free of disease.

PLANT PAT. 595

#### LUCIA ZULOAGA

\$1.25

This brownish scarlet rose with a golden undertone is an excellent coastal rose. There are only 15-20 petals in the bloom but bud and flower are both very attractive. Foliage has a wonderful glossy green texture that has been free of disease.

#### LULU

\$1.25

We feel this old rose is worth growing. No other has such long slender perfectly formed buds as Lulu. Buds are a rich salmon rose. Plant is a medium grower, with clean foliage. A prolific blooming rose, though semi-single; excellent for cutting.

#### MAJOR SHELLEY (Howard & Smith)

\$1.50

Especially adapted to coastal regions. The large, long pointed bud is produced on long stems. Its rich crimson scarlet bloom has fine form and is most attractive. The bush is of upright habit, moderately vigorous, with fine array of leathery foliage. A good rose.

PLANT PAT. 447

#### MARK SULLIVAN

\$1.50

For a display of dazzling color, Mark Sullivan is the rose to produce it. A strong growing plant with dark green foliage, it produces an abundance of flowers throughout the season. The ovoid buds are golden yellow heavily veined with rose pink and cerise; a brilliant display of color in the open flower. This rose is at its best in warm climates.

#### McGREDY'S SUNSET

MRS. H. M. EDDIE

\$1.75

If you are looking for an excellent bedding rose for a mass of orangish-yellow high-centered blooms tinted with red, McGredy's Sunset will be ideal. The plants are bushy and the foliage a bronzy green. It is a prolific bloomer that grows to perfection in a cool climate.

PLANT PAT. 317

#### McGREDY'S YELLOW

\$1.50

A really fine rose and a very prolific grower and bloomer. Flowers are large and of a bright buttercup yellow of good form. Foliage is glossy, dark green with deep reddish green stems. This is truly one of our finest yellows.

#### MIRANDY

A very large full rose of 40-50 petals of rich red with black shadings which is one of the most fragrant roses. Plants are upright, of medium height and heavy foliaged. Hot, dry weather is a "must" for this plant as it will "ball" and fail to open properly in cooler climates where it is also subject to mildew.

PLANT PAT. 632

#### MISSION BELLS

(Germain's Seed Co.)

An early blooming deep salmon pink rose. The long pointed buds, usually borne singly on a stem, open to full centered flowers of average fragrance. The plant is exceptionally vigorous in growth and rangy in habit and seemingly quite resistant to disease. An excellent rose.

PLANT PAT. PENDING

#### MME. COCHET-COCHET

\$1.50

The long pointed buds of coppery pink, slushed orange at the base open to large beautifully formed satiny pink flowers with gold at the base. These unusually free flowering plants grow tall with fine foliage. An exceptional rose for southern U. S.

PLANT PAT. 129

#### MME. HENRI GUILLOT

\$1.75

This rose is proclaimed throughout the country as one of the best in cultivation today. The buds are long and pointed and of a clear orange, coral and red with gold at the base of the petals. The opening buds are urn shaped and the open flower camellia shaped. The petals have an exceptionally heavy velvety texture. The plant is one of the best found in roses with heavy dark green leathery foliage from the ground to the neck of the bloom. Very floriferous.

PLANT PAT. 337

#### MRS. EDWARD LAXTON

A satisfactory rose of the lesser known varieties. The large ovoid buds open to full, very double flowers of luminous old rose with flamingo orange undertones. An excellent cut flower with fine strong stems and fragrance which come from a very vigorous, upright growing plant with heavy, dark green, disease-resistant foliage. An excellent rose.

#### MRS. E. P. THOM

\$1.25

16

A good, outstanding old yellow rose. The medium sized, well formed buds of clear canary yellow are borne in great quantities on a strong well balanced, glossy foliaged plant. The double clear yellow open flowers are moderately fragrant. A good dependable rose.

PLANT PAT. 428

A very double red rose, which is attractive through all stages of development. The multi-petaled full bud opens to showy scarlet rose with a rose red undertone overlaid with a rich velvety sheen. The blooms, of raspberry fragrance, are long lasting and do not blue under normal conditions. A vigorous, somewhat upright grower of

(Swim)

\$1.75

One of the newer red roses. The buds which are long and streamlined, are very dark red with blackish sheen. Plant is a strong bushy grower with dark green foliage. Moderately fragrant. Will mildew in cooler climates. Best in very warm, dry climate.

PLANT PAT. 713

One of the better creamy whites. A full heavy bud opening to a large, very double rose, whose high center is creamy white, passing to pure white on edges. The foliage is large, dark and leathery, with a consistent gloss. The plant is a medium grower, but well shaped. An interesting rose.

PLANT PAT. 753

#### MRS. MINIVER

\$2.00

This cardinal red rose is probably the most dazzlingly bright of all the reds. It has about 20 large, ruffled petals which are arranged in a loose, artistic fashion.

PLANT PAT. 725

#### MRS. PIERRE S. DU PONT

\$1.25

The pointed buds of medium size and of a reddish yellow tint open to a fragrant semi-double blossom of golden yellow. It is one of the most prolific bloomers of the yellow roses. Plants are bushy and foliage is disease resistant.

#### MRS. SAM McGREDY

This rose is probably the best of the roses that this famous hybridizer has produced. It has a wonderful combination of colors, scarlet, orange heavily flushed with Lincoln red on outside of petals. Buds are large and long pointed, flowers double, fragrant and very lasting. The bush is a medium grower with abundant glossy foliage; young foliage a dark reddish green. A prolific bloomer.

#### **NEIGE PARFUM**

\$1.50

One of the most fragrant roses. The long, well formed bud is creamy white, but with faint shadings of lemon at the base, and opens to peony shaped flower of pure white. These flowers are produced on long stems from a medium full plant, clothed in dark, heavy foliage.

#### **NEVILLE CHAMBERLAIN**

\$1.75

For beautifully formed buds with a high center this rose is hard to beat. The color is somewhat similar but softer than Mrs. Sam McGredy, burnt orange and buff. The plant is a strong grower with fine foliage.

### NEW YORKER (Jackson & Perkins)

\$2.00

about 3 ft., well clothed with attractive foliage.

PLANT PAT. 823

NOCTURNE

#### **NUMA FAY**

A consistent bloomer that will produce large numbers of very double flowers that are excellent for cutting. The coral pink buds with an orange salmon base open to large blooms of a satiny texture. Plants and foliage are both vigorous. We like this rose better each year.

We still think Peace is one of the finest roses yet intro-

duced. Here in our climate the opening color varies from

primrose yellow to lemon yellow with edges tinged cerise.

As the large 50 petaled bloom ages, the yellow becomes lighter while the pink to watermelon shades intensify. Excellent as a cut flower. A very strong grower, four

feet or more with long, strong stems and excellent dark

PLANT PAT. 591

green, leathery, disease-resistant foliage.

PEACE

\$2.50

A soft, pastel colored rose of great floriferousness. The large opening buds are a dark apricot buff on the outside with a touch of salmon pink to orange on the inside of the petal. Fruity fragrance.

PLANT PAT. 366

**RAPTURE** 

\$1.25

\$1.50

The best of the Ophelia family. The strong well branched plants produce long pointed buds of pink with shades of apricot. These opening blooms possess good fragrance and all the charm and beauty of the Ophelia group.

#### RED TALISMAN

RAMON BACH

\$1.25

A Talisman sport originating in our fields. The long pointed bud is a deep maroon red passing to a lighter shade in the sun. The many long stems are borne on erect growing plants of vigorous nature making an excellent cut flower especially in early spring. The medium sized double flowers are quite fragrant.

\$1.75

A brilliant rose-red with a long, graceful bud. The color in the half-open flower is accentuated by the reverse side of the petal which is several shades lighter. A tall, vigorous grower with dark green foliage and strong stems. Best in warm areas.

PLANT PAT. 758

SAN FERNANDO

(Morris)

\$1.75

This is a satisfactory new red rose for warmer climates. Buds are long, pointed, and open to double non-fading flowers of glowing scarlet with exceptionally strong fragrance. Plant is a strong upright grower with heavy, semi-glossy foliage.

PLANT PAT. 785

#### SAN LUIS REY

\$1.75

One of the most brilliant yellow roses which has an appealing fruity fragrance. The deep saffron yellow buds are medium sized and globular in shape. The plants are well branched and the foliage is a rich, dark, glossy green that is disease resistant.

PLANT PAT. 861

#### SANTA ANITA

\$1.50

The strong pink buds of excellent form open to double, high centered blooms. Stems are sturdy on this bushy plant. Foliage is a light green. A good grower and bloomer of low habit make it a fine bedding rose.

PLANT PAT. 539

#### **SATURNIA**

\$1.75

For brilliance of color and beauty of form this rose is unsurpassed. The perfectly formed long, pointed buds of cardinal red open to semi-double flowers of brilliant scarlet to cardinal red with a reverse of salmon yellow and copper. Plants are vigorous with excellent dark green foliage. This is one of the best bi-colors and is especially fine in a coastal climate. Fruity fragrance.

PLANT PAT. 349

## PEACH BLOW

\$1.25

A beautifully formed fragrant double rose of peach pink, flushed and veined rose pink, with a golden base, produced on strong stems. Excellent for cutting. Plant is a very vigorous grower with dark green, leathery, diseaseresistant foliage. Excellent in coastal areas.

**PICTURE** 

\$1.25

What a picture it is! Every rose seems to be perfectly formed. It is a medium size double flower with a perfectly formed high pointed center, with outer petals reflexed and unusually lasting. The color is a warm, cheerful lasting, velvety rose pink, with an undertone of salmon. Tea fragrance. The plant is a medium grower with fairly resistant foliage. An abundant bloomer.

#### PILAR LANDECHO

The long, pointed buds of orange with distinct red veinings open to semi-double flowers. Foliage is a dark green, heavy and leathery.

### PINK MOSS

\$1,25

This original moss rose of the 16th century is probably the most satisfactory and attractive of the moss group. A vigorous, highly productive pink, which seems to be at home in partial shade as well as full sun.

#### PRESIDENT HERBERT HOOVER

\$1.25

It has a long pointed bud of orange scarlet opening to a large flower of orange and pink. As the flower ages the bright colors pass to a creamy pink. The petals of this rose have such a wonderful substance that it is an unusually fine cut flower. A very strong upright grower. Mildews slightly.

#### PRESIDENT MACIA

A lovely large double two toned pink rose. The inside of the petals is a flesh white, while the outside is veined and suffused with a rich mauve rose. Plant is a very strong grower and a profuse bloomer. Prefers warm weather. Recommended for southern States.

SHOT SILK

SUTTER'S GOLD

\$2.25

A beautiful combination of orange rose overlaid with yellow and suffused with pink. Bush is a good grower with an abundance of glossy, dark green foliage. Will thrive in shade. A continuous bloomer with cup shaped, fragrant flowers.

SHOW GIRL (Dr. Lammerts)

\$1.75

This is what the introducer says about it:

Amazingly long, lovely buds, perfect for cutting, borne on long stems. The color is a rich phlox pink, deeper in the spring, lightening as the flower opens to a softer tone but always deep pink. The plant is a very strong grower with fine, large foliage—a very prolific bloomer.

PLANT PAT, 646

SIERRA GLOW

\$1.75

An excellent rose in warmer climates. The long, pointed salmon pink buds open to large, double, light pink flowers with a reverse of orange salmon. Plants are low growing and spreading and should be pruned lightly on the top; the lower branches should be pruned to an inside bud to force growth upward.

PLANT PAT. 521

**SIGNORA** 

\$1.75

This rose from Italy is a real masterpiece, in both plant and bloom. Long bud of a warm burnt sienna opening to a lighter hue toward mandarin. The plant is a tall grower (4 ft.) with every bloom on a long, strong stem. The foliage is handsome. (Colle Oppio Gold Medal 1935.)

PLANT PAT. 201

**SNOWBIRD** 

\$1.50

This is truly a snow-white rose of good fragrance. The medium sized, long flaring buds open into snowy white, very double, high centered blooms, which remain very attractive throughout. The very vigorous, free branching plants, covered with a disease-resistant leathery foliage, are extremely free blooming. An excellent white rose under most conditions.

SONATA

\$1.75

We are very enthusiastic over this rose as it is one of our best cutting, exhibition roses. Its long pointed buds of cochineal red open to full double roses of lively deep pink with the reverse of the petals being slightly darker. This harmonious contrast with its mild aroma make it most desirable. The blooms are borne on strong stems on vigorous growing plants with a good leathery foliage. An excellent rose, although at times it fades.

PLANT PAT. 732

SUSAN LOUISE

\$1.50

This lovely rose has proven satisfactory wherever grown. A seedling of the Belle of Portugal, but a bush rose and a continuous prolific bloomer. Bud is long and slender and of a deeper shade of pink than its parent; stems are long and firm. Growth is extremely vigorous and practically thornless. No garden is complete without Susan Louise.

(H. Swim)

An excellent rose featuring exquisite, long pointed, bright vellow buds, richly shaded orange and red. The opening flower is a lovely high centered arrangement of about 30 crisp, heavy textured petals, and it possesses a superior fragrance unusual to yellow roses. The very vigorous well balanced plant has been very resistant to the common rose diseases. A fine rose! Winner of Foreign Gold Medal of the famous Bagatelle Rose Trials in Paris.

PLANT PAT. PENDING

SUZON LOTTHE (Meilland '50)

\$2.50

Suzon is one of the loveliest and most delicate in coloring of the newer pinks. It has a high center and holds its form very nicely as it opens to the full blown rose. The soft pearl pink petals shade to a deeper pink at the edges where they have been more exposed to the sun. The center of the rose is peach. A delightful fragrance. The bushes are strong and have good textured foliage. It is indeed a worthy daughter of Peace!

PLANT PAT. 885

SWEET SIXTEEN (W. E. Lammerts)

\$1.75

Here is a superb rose, particularly adapted to coastal areas. The long slender buds open to beautifully formed flowers of light pink with shades of rose and gold. These sweetly scented blooms are borne on strong stems and are excellent cut flowers.

PLANT PAT. 631

SYMPHONIE (Meilland '50)

\$2.50

There is no other pink rose which has the luminous quality of Symphonie. The silvery undertones and the fine netting of veins make it most appealing. The blooms are large and intensely fragrant. Foliage is glossy and quite free of disease. The blooms may burn somewhat in hot summer sun but are a glory in spring and fall. This is another distinguished daughter of Peace.

PLANT PAT. 958

(Dr. Lammerts)

Resembling the old favorite, Mrs. Sam McGredy, Taffeta is outstanding in its ability to produce long stemmed, perfectly formed, fragrant buds of pink to salmon, with varying color combinations. Plant is a strong, upright grower with reddish green foliage. Best in warm climates. PLANT PAT. 716

TALISMAN

The color is a mixture of red, yellow and copper in varying proportions. The bud is long pointed and opens to a medium size flower of the same colors. Extremely fragrant. An excellent cut flower. Growth is vigorous and upright. Mildews slightly.

TALLYHO

(H. C. Swim)

Tallyho is an attractive large bi-color pink rose with a spicy fragrance. The large ovoid buds of Chinese red pale to Chinese rose as the bloom opens. The color and form of the flower are both distinctive. Plants are strong growing and sturdy. Best adapted to warmer regions.

PLANT PAT. 828

TEXAS CENTENNIAL

\$1.25

Texas Centennial is a sport of the popular rose President Hoover. Type of growth is the same although it appears to have more and better foliage. Quite prolific in bloom. Flowers are brick red, having a faint tinge of gold, with a lighter center. This rose has shown up very well. A splendid exhibition rose.

#### THE CHIEF (W. E. Lammerts)

\$1.75 CINNABAR

We like this rose for its profuse blooming qualities and the excellent plant. The long buds of deep rose flame open to large fragrant flowers of flame, coral and copper. The plant is a very strong, upright, spreading grower with large dark green leathery foliage.

PLANT PAT. 456

#### THE DOCTOR

\$1.50

The Doctor is a fine addition to our small group of fine true pink roses. The buds are very long and pointed and open to very large double flowers of light pink. The plant is a medium grower, intensely fragrant.

#### WHITE WINGS

\$1.50

Called by some the white counterpart of Dainty Bess, these silvery white blooms with wine colored stamens are borne in pyramidal sprays. Good foliage. Plant of medium height.

PLANT PAT. 850

## POLYANTHA and FLORIBUNDA ROSES

Polyantha are the small roses usually produced in clusters and commonly called "Baby Roses". Floribunda is a new classification of the larger flowering varities of the polyanthas which are becoming more popular. They are most effectively used in mass plantings along driveways, walls or for border planting, etc. Floribundas come in a wide range of colors and produce a mass of color over a long period of time. All of those listed below are quite free of disease.

#### ALAIN (Meilland)

\$1.50

An attractive bright carmine red blossom that comes in large clusters. The blooms are fairly double and when fully open show gleaming golden yellow centers. Foliage is thick and stems are sturdy.

#### BETTY PRIOR

\$1.50

For a mass of color and continuous bloom Betty Prior is one of the best. The single blooms, produced in large clusters, are shrimp pink on the inside of the petal and carmine pink on the outside. The plant is a very strong grower (4 to 5 ft.) with healthy, leathery foliage. PLANT PAT. 340

\$1.25 CALIFORNIA GOLD

This polyantha is most striking in color and does not fade too readily. The large clusters of globular bright orange vellow flowers are borne on strong shoots, which keep coming throughout the blooming season. A rose especially adapted to border plantings and color accents amongst foundation plants. A very vigorous bushy grower.

#### CECILE BRUNNER

\$1.25

19

The sweetheart rose. Buds small, beautifully formed. Flowers light pink with yellow at the base of the petals. A continuous bloomer and fragrant.

\$1.25

A medium sized semi-double bloom of brilliant cinnabar or vermilion to scarlet red. As the flower ages, the petals take on dark shadings. The plant is an excellent grower with large, glossy, dark green foliage. Disease-resistant. Growth about 3 feet.

#### DONALD PRIOR

\$1.50

This floribunda produces large clusters of deep red flowers as well as many individual blooms thus giving a very dense mass effect. The eight petaled flowers have a delicate fragrance. About 2 1/2 feet.

PLANT PAT. 377

### FASHION (Boerner)

\$2.00

An exquisite newer floribunda in a luminous coral pink color. The clusters of oriental red buds open to soft clear coral blossoms of slightly ruffled petals and golden yellow stamens. Plants are bushy and the foliage is finely cut and somewhat susceptible to mildew and rust where such diseases are a problem. Lovely in borders or clusters.

PLANT PAT. 789

#### **FLORADORA**

\$1.50

Here is one of the new floribundas which is different from any other rose of its type. It is a brilliant cinnabar with shades of scarlet geranium red. The 25-petaled rosette flowers are borne in small clusters and in our coastal climate blooms about eight months of the year. The plant is a tall grower, 4 feet, with excellent bronzy green foliage.

#### GERANIUM RED (Boerner '47)

\$1.50

The blackish red buds open slowly into vivid scarlet roses that resemble the old-fashioned red geranium in form and delightful fragrance. Bushes are compact, vigorous, hardy, and seemingly not susceptible to the common rose diseases. Very effective in mass or single plantings.

PLANT PAT. 811

#### GOLDILOCKS (Boerner)

Here is the best yellow floribunda we have seen so far. The buds are of medium size and open to very double, fragrant blooms which are produced in clusters. The plant is a vigorous, bushy grower, well covered with leathery, glossy, disease-resistant foliage.

PLANT PAT. 672

#### MARGO KOSTER

\$1.25

A low, compact growing polyantha (18 inches) with an abundance of medium sized, disease-resistant foliage. The blooms, which are ovoid in form, are orange-red in color and are produced in clusters throughout the season.

#### MRS. DUDLEY FULTON (Thomas '31)

\$1.75

Here is a lovely single silvery white polyantha that is nearly always in a profusion of bloom. Its tresses of flowers, and glossy foliage and low habit of growth make it most desirable for border plantings. It is wonderfully disease resistant and will remain free of mildew even when planted in shade.

This rose produces a spectacular mass of color. The small, cup shaped semi-double roses are borne in large clusters throughout the season. Each plant produces hundreds of bright orange-red blooms which form a magnificent color mass in contrast to the heavy green foliage. Especially adapted for mass planting, hedges, etc. The name is deceiving as Red Triumph would better describe the rose.

#### PINK AACHEN

A very double salmon-pink floribunda. Flowers are about three inches in diameter slightly fragrant. A good bloomer. Plant is low and bushy with fine disease-resistant foliage.

#### PINK BOUNTIFUL

\$1.50

These semi-double roses, with perfectly formed buds, are two-toned pink. Blooms are produced in clusters throughout the season. An excellent cut flower. Plant is a strong, bushy grower.

PLANT PAT. 601

#### PINK GROOTENDORST

\$1.25

A rugosa rose that is well adapted for hedges and as a shrub. The bushes are dense growing and have thick, crinkly foliage that does not mildew. The bright pink flowers come in clusters and resemble small carnations.

#### PINKIE 2

(H. C. Swim)

Here is a perfectly formed polyantha rose (baby) with long, slender buds. The open flower is about two inches across. Pinkie is very floriferous, the blooms being produced in large clusters. It produces a very compact plant of about 18 inches with small, very disease-resistant foliage.

PLANT PAT. 712

#### **PINOCCHIO**

\$1.50

One of the best of the floribunda roses. The blooms come in fairly large clusters. The small pointed buds are salmon and gold changing to a soft clear pink. The plant is a bushy upright grower with an abundance of diseaseresistant foliage. A continuous bloomer. Growth about 3 feet.

PLANT PAT. 484

#### RED PINOCCHIO (Jackson & Perkins)

\$1.50

A popular addition to the Pinocchio group. The deep satiny carmine buds open to long lasting rich carmine flowers, which deepen in color and acquire a velvety cast as they open fully. The large clusters, interspersed with single blooms, have a delightful wild rose fragrance. The plants are bushy and rather upright producing quantities of flowers on long heavy shoots.

PLANT PAT. 812

### RED RIPPLES

If you are looking for a small pointed dark red bud suitable for boutonnieres, Red Ripples is perfection. Produced in large clusters, each bud is a perfect little buttonhole rose. Plant is a tall upright grower, a steady bloomer and with clean foliage.

#### ROSENELFE

\$1.25

This is one of the best of the floribundas for cut flowers. A vigorous, upright growing plant with large leathery foliage. Buds are long pointed, double La France pink. Blooms are usually produced in small clusters.

### **SUNSHINE**

A very lovely dwarf polyantha (about one foot) that is at its best in a cool climate. Flowers are small, double, of a golden orange and borne in clusters. It is a continu-

ous bloomer with foliage free of mildew. Moderately fragrant.

#### THE FAIRY \$1.25

The Fairy is a new polyantha and one of the loveliest little roses you can imagine. The small coral pink buds open to very double flowers about an inch in diameter. They are borne in large clusters and are profuse bloomers all season. The plant is a vigorous spreading grower about 1½ to 2 ft. high and 4 to 5 ft. across. Foliage is small, dark, glossy green and very free of disease.

VOGUE

(Boerner '52)

\$2.25

This '52 All American Selection is a sister seedling of Fashion. It is a glowing cherry-coral color. The flowers are high centered and have a very lovely form. Plants are upright in habit and will become 21/2-3 feet tall, making them ideal for hedging and mass effects. The large tresses of flowers have a spicy fragrance similar to carnations. Foliage is a rich dark green that is disease resistant. PLANT PAT. 926

#### WORLD'S FAIR

\$1.50

Velvety, bright red flowers characterize this prolific bloomer. Flowers have about 20 petals and measure about four inches across. Color becomes darker in the fall. PLANT PAT. 362

#### YELLOW PINOCCHIO (Boerner '51)

\$1.50

This plant is a mound of apricot-yellow blossoms with tinges of pink when it is in full bloom. The flowers come in large heads, but the individual flowers are not as large as those of the other members of the "Pinocchio family." A sturdy grower. PLANT PAT. 992

## CLIMBING ROSES

ALOHA (Boerner '50)

A new rose-pink climber of fine blooming habit. The flowers are very large and double and are borne in clusters. The terminal bud opens first and is followed by the secondary buds. A good repeat bloomer. Excellent waxy foliage. We have had no previous experience with this rose. PLANT PAT. 948

#### **AUTUMN**

\$1.50

A climbing sport of the bush variety. Flowers are a deep burnt orange streaked with red. Moderately fragrant.

#### BLAZE

This is one of the more spectacular climbers. The cupshaped, blazing scarlet blooms are borne in clusters which cascade downward completely covering the plant. The recurrent bloom is slightly fragrant and contrasts well with the large, dark leathery foliage. A plant that requires a minimum of care, being vigorous in growth. A good rose for brilliance of color, similar to Paul's Scarlet, but a more consistent bloomer. PLANT PAT. 10

#### CLG. CECILE BRUNNER

\$1.50

A strong growing climber which produces quantities of small, beautifully formed buds. The flowers are a light pink with yellow at the base of the petals. The small, soft green foliage is quite compact, forming an interesting background for the masses of pink buds and flowers.

#### CHRISTOPHER STONE

This vivid scarlet flower with a velvety sheen is probably our brightest red climber. Flowers are large and very showy. Not as vigorous a grower as some of the other reds but very pleasing in effect.

The short ivory white buds open to semi-double white flowers of about two inches in diameter with showy yellow stamens. The flowers are borne in small clusters throughout the season on strong growing plants. The fine medium-sized dark, glossy foliage is a show in itself.

#### COUNTESS OF STRADBROKE

\$1.50

This dark velvety crimson Australian rose is an excellent pillar that grows to a height of about 10 feet. The fragrant buds are large, double, and of perfect form. The new foliage has a reddish-green tinge which becomes a dark green with age.

#### CLG. CRIMSON GLORY

\$2.00

This is a good red climber for warmer areas. The typical Crimson Glory blooms, large, high centered crimson blooms, are produced on strong stems over a long period on a compact, well clothed plant. The combination of excellent form, fascinating fragrance and profusion of blooms stamp it as a good red climber. PLANT PAT. 736

#### DAILY MAIL SCENTED

\$1.50

High fragrance and a deep crimson color mark this rose. Plants are vigorous bloomers but slightly susceptible to mildew. Best in the Pacific Coast area.

#### DAINTY BESS

\$1.50

An excellent blooming single climber which is unfortunately more susceptible to foliage disease than is desirable. Its soft rose pink flowers and bright crimson stamens make it one of the loveliest of the single flowers. A fine repeat bloomer. Try planting a clematis at its base for a most pleasing effect.

#### DR. JOHN GALLWEY

\$1.50

This rose will appeal to those liking a snow white single rose produced in great trusses. The plant is an exceptionally strong grower with glossy dark green disease-resistant foliage. Especially recommended for coastal regions.

#### DUCHESS OF ATHOL

The bud and flower of this English rose are an intense vivid orange. Very strong grower.

#### CLG. DUCHESS OF PENARANDA

A strong grower of appealing color. The buds are brilliant orange, opening to coppery apricot. However, this color does change at different times of the year as the flowers age. Each new tone of color is always a pleasant surprise. This climber has plenty of light green foliage with an abundance of fragrant blooms. One of the best in its color range.

#### CLG. E. G. HILL

\$1.50

A good red climber producing very large blooms of dazzling scarlet shading to deeper red. This very double rose is exceedingly fragrant and seems to cut well. This good growing plant has healthy clean foliage and is a free bloomer. One of the better red climbers in the large bloom group.

#### CLG. ETOILE DE HOLLAND

\$1.50

A climbing sport of one of our best red roses. This beautiful dark, velvety maroon red seldom blues. Its great abundance of fragrant blooms are excellent for cutting. Often the growth is slow the first year, after that it is a very vigorous grower, with plenty of heavy disease-resistant foliage. The best red climber.

#### GOLDEN EMBLEM

This old time favorite has rich cadmium yellow blossoms that are shaded red. The blooms are large and very double. Foliage is a deep glossy green. It will not tolerate heavy pruning as it is subject to dieback. It is advisable to paint cuts of any size.

### HIGH NOON

(W. E. Lammerts)

\$2.00

A pillar type yellow climber of spectacular color. The medium sized buds are a bright golden yellow, usually borne singly, which lighten when open, giving forth a mild fragrance. The rich green foliage appears to be resistant to the usual rose diseases. The continuous blooming habits, even through the summer, make it a most satisfactory accent plant.

PLANT PAT. 704

#### CLG. HINRICH GAEDE

\$1.75

A medium growing climber for a limited space, producing a continuous array of brilliant flowers. The bud is a clear nasturtium red, opening to a large, very double flower of orange-red. The attractive bronze-green foliage is quite resistant to disease. A good brilliant colored climber.

PLANT PAT. 244

#### J. OTTO THILOW

\$1.50

The large perfectly formed glowing rose-pink flowers make this a very desirable climber. Growth is strong and the foliage is thick and leathery.

#### CLG. LADY FORTEVIOT

\$1.50

An excellent climber for the cooler coastal areas. A very vigorous climber with glossy, bronze-green foliage that produces a continuous show of blooms. Its very deep golden-yellow to orange-yellow buds open to deep apricot blooms of exceedingly fine fragrance.

#### **MERMAID**

These large single blossoms of sulfur vellow with amber stamens come in huge clusters but only several will open at a time. It is a profuse bloomer throughout the season. The foliage is glossy green and very disease resistant. Excellent as a ground cover.

#### CLG. MME. BUTTERFLY

\$1.50

One of the best pale pink climbers; a member of the Ophelia family. This very vigorous rose produces quantities of long, pointed buds on strong stems. The high centered, double blooms of salmon flesh with light yellow at the base of the petals are moderately fragrant. The heavy green foliage is excellent.

#### CLG. MME. HENRI GUILLOT

An excellent appearing plant with heavy, dark green, leathery foliage. The buds are long and pointed and of a clear orange-coral and red with gold at the base of the petals. The opening buds are urn shaped and the open flower camellia shaped. It is very floriferous in the spring slowing down considerably during the summer and fall. PLANT PAT. 788

#### MME. GREGOIRE STAECHELIN

\$1.50

Large, soft pink flowers with a peculiar petal quality give this rose a unique value and beauty. The buds are long and fragrant. A vigorous grower but will give only one good blooming.

#### CLG. MRS. HERBERT STEVENS

\$1.50

This climber has a most perfectly formed white bud with pleasant fragrance, but being a tea rose, its stems have a tendency to be weak. It is a strong grower with good foliage, but must be planted in full sun to secure best results. Except for its weak stems, it is a good rose.

\$1.75 CLG. ROSE MARIE

\$1.50

We unhesitatingly recommend this as one of the very finest climbers. Its striking coppery-pink to salmon-pink blooms are produced incessantly throughout the season. The buds open to very full, double flowers of good fragrance. The plants are very vigorous and covered with an abundance of glossy green foliage which is a spectacular reddish-green when young.

PLANT PAT. 394

#### PAUL'S SCARLET

\$1.50

A most spectacular rose in the spring. Entire bush is a mass of medium size, intense, vivid scarlet blooms, often producing a scattering of summer blooms.

PEACE

\$2.50

A remarkable sport of the bush Peace. The golden yellow buds flushed pink at the edges open slowly into large, ruffled blooms of pale yellow to cream with tinges of pink. The plants are as remarkable as the blooms with their strong stems, shining dark green foliage and vigor. Repeat bloom is fine.

PLANT PAT. 932

PHYLLIS BIDE

\$1.50

An extremely vigorous grower that produces masses of small primrose and pink flowers somewhat similar to Cecile Brunner. A good recurrent bloomer. No pests.

CLG. PICTURE

\$1.75

One of our best pink climbers. A strong grower, more satisfactory in the climber than in the bush, but with the same high centered specimen type bloom.

PLANT PAT. 524

PINKIE

\$2.75

This sport of the very floriferous polyantha has the same excellent blooming habit. The plant is completely covered in springtime with tresses of pink bloom. The repeat bloom is fine. It will make a delightful display in your garden.

PLANT PAT. PENDING

QUEEN ALEXANDRA

\$1.50

A bi-color rose of red inner petals with a reverse of yellow. One of the first to bloom in the spring.

CLG. RED TALISMAN

\$1.50

A fine red for early spring color. The large quantities of deep maroon-red buds are borne on long, strong stems suitable for cutting. In hot weather the buds pass to pink tones. The foliage is the typical Talisman light green.

A climbing sport of that old favorite bush rose, Rose Marie. Buds are large globular, moderately fragrant and a clear rose pink. Fine stems and foliage.

CLG. SHOT SILK

\$1.50

Another fine climber. A sport of the well known bush variety that is satisfactory in all localities. Flower slightly larger than the bush type and of the same orange-rose color suffused with pink. Glossy foliage.

SHOW GIRL

\$1.75

A climbing sport of the bush variety which produces quantities of deep pink, perfectly formed buds on long stems. A vigorous grower with good luxuriant foliage.

PLANT PAT. 892

SOUVENIR de CLAUDIUS DENOYEL

\$1.50

An excellent type pillar rose. The very fragrant buds open to bloom of rich crimson scarlet. One of the most prolific bloomers as it is the first to bloom in the spring and the last in the fall with good intermittent bloom.

SUNGOLD (Geo. C. Thomas, Jr.)

\$1.75

This is one of the finest yellow climbers we have seen in many a day. The buds are long, pointed and a clear golden yellow. As a rule, the buds come singly on long strong stems and are freely produced throughout the season. The plant is a strong climber with clean glossy foliage. In the years we have grown it, it has been absolutely free of disease.

CLG. TALISMAN

\$1.50

A fine climber of a mixture of red, yellow and copper. The bud is long pointed, and opens to a medium sized flower. A very fragrant flower, suitable for cutting.

CLG. TEXAS CENTENNIAL

\$1.75

An extremely strong growing climber which produces an abundance of long stemmed blooms suitable for cutting. The long, erect stems produce large brick-red to carmine-red buds of excellent form, which open into huge rosy red full blooms. This is one of the better strong growing climbers, with spicy fragrance.

PLANT PAT. 565

YELLOW TALISMAN

\$1.50

A yellow sport of Talisman which has all the good qualities of its parent.

## TREE ROSES

Tree or standard roses may be used in both formal and informal gardens, among your bush roses, along the drive, walk, or boundary line, as tub plants, and in a variety of other ways. They often produce larger and lovelier blossoms than the bushes. For greatest effectiveness they should not be planted closer than six feet.

We are offering tree roses in four different heights:

WEEPERS—These standards are budded to a climbing variety at a height of six feet. The effect of the blanket of flowers cascading to the ground is a spectacular sight. A special metal frame or umbrella is required to support these plants. Write for list of available varieties. Limited supply.

Price-\$10.00 each (no discounts).

Frame-\$6.00 each.

Shipping charges at cost.

Full Standards—Our full standards budded at 36 inches are available in the following varieties:

Bravo Charlotte Armstrong Debonair

Mrs. Pierre S. Du Pont Mrs. Sam McGredy Neville Chamberlain New Yorker

**Eclipse** Fandango Peace

Fred Edmunds Picture Helen Traubel Saturnia I. Otto Thilow Snowbird Mark Sullivan Symphonie Mme, Henri Guillot Sutter's Gold Price \$5.00 each

Ten for \$45.00

Quarter Standards—These standards are budded at nine to ten inches and are ideal for tub culture and in the garden as accent plants. Available in the following varieties:

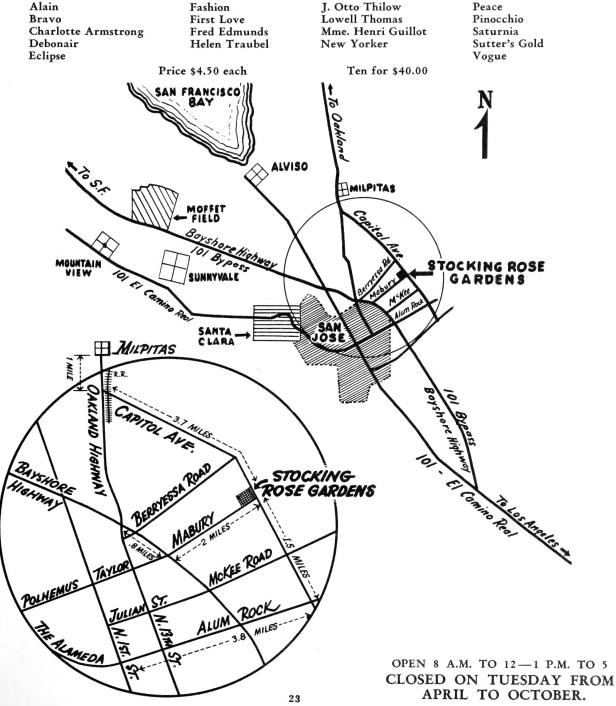

> Mme. Henri Guillot Charlotte Armstrong Peace

Eclipse

Price \$3.25 each Ten for \$28.00

Because of the extra care and large cartons that must be used in shipping standards we are charging 50c per tree on any order containing one or two standards. There is no charge for three or more trees.

Half Standards—Of increasing popularity are our patio standards which are budded at a height of 24 inches. Available in the following varieties:
